Skills

- Frontend : HTML, CSS, Bootstrap, JavaScript, React.js
- Backend : Python, Node.js
- Databases : SQLite
- Other Skills : Andriod App, Flexbox, Git

key Skills & Strengths

- Proficient in MS Office.
- Excellent Verbal and Written Communication Skills.
- Able to perform in high pressure environment.
- Good analytical and problem-solving skills.

PROJECTS

Digital Armor : Cloud - Driven transport System

- Created modern application for user to transfer the data securely to the autonomous vehicles. It helps preventing from cyber attacks and data stolen.
- I used cloud which acts mediator between User and Autonomous vehicle. And also used AES algorithm which helps to secure data from cyber attacks.

Prediction of Diabetes using Random forest Algorithm

- Created a user interface which helps to identify if user has diabetes or not.
- I trained a random forest machine learning model which helps user to identify if user having diabetes or not .

About Me

Highly motivated and detail-driven recent MCA graduate with a solid grasp of software development fundamentals, algorithms, and data structures. Proficient in a range of programming languages and technologies, including JavaScript, SQL, Python, HTML, CSS, Node.js, and React.js. Proven experience in developing web applications, UI design, and backend development. Passionate about crafting innovative software solutions to complex problems and eager to join a dynamic development team where I can apply my skills, learn, and make a significant impact.
